

Lease

Proposal

Next Level Veghel

Kempkens 2100, Foodpark

A High Quality Logistics Centre situated in Veghel, a logistics hotspot of the Netherlands and a gateway to Europe

This future-proof warehouse is located in Veghel. With close proximity to the national highway A50 and the inland barge terminal, this location makes it the ideal centercourt for logistics and industrial real estate. Due to the excellent infrastructure for rail, road and barge, it provides great transportation possibilities. The environmental classification allows up to category 4.1, which is suitable for most industrial and logistic use.

Location

The new industrial area 'Foodpark' in Veghel is located close to the A50 motorway connecting the Eastern access in the Netherlands from North to South. Foodpark is an extension of the established park Doornhoek located at the south of Veghel. The site provides great logistics connectivity and is in close proximity of the inland barge terminal.

Legend

- Airport
- Rail terminal
- Barge terminal
- Container terminal
- Rail en barge terminal

Description	Unit 1	Unit 2	Total
Warehouse / Expedition	leased	25,221 m ²	50,938 m ²
Mezzanine	leased	2,299 m ²	2,188 m ²
Office	leased	590 m ²	1,108 m ²
GLA			54,234 m ²
Site			80,000 m ²

Siteplan Unit 2

Warehouse Veghel comprises 25,221 sq. m. warehouse, a mezzanine of 2,299 sq. m., as well as 590 sq. m. of office space. As the property can be divided in two units, it is suitable for single or multi-tenant use.

Unit 2

Unit 2

Building Specifications

Warehouse

Free height	12,20 m
Maximum storage height	12,10 m
Grid structure	12x22,8 m
Depth warehouse	144 m
Floor load capacity	5.000 kg/sq. m.
Point load capacity	8.000 kg
Loading docks	26 docks
Doors	Electric overhead doors

Mezzanine

Free height under mezzanine	5,2 m
Depth mezzanine	12 m
Location	Above loading docks
Floor load capacity	600 kg/sq. m.

Sustainability

BREEAM-NL certificate	Qualification 'Very Good'
Brownfield Development	
Prepared for solar panels	

Office

Setup	Separate office per unit
Configuration	Landscape offices in 2 layers
Inner free height	Minimum 2,7 m
Floor load capacity	400 kg/sq. m.
Cooling system	VRF ceiling system

Site

Car parking spaces	131
Truck parking spaces	-
Bicycle shed	1 per unit

Zoning Plan

Zoning plan regulations up to cat. 3.2.

Excluded from scope

- ▲ Racking warehouse and racking safety requirements;
- ▲ Signing/Lining inside and outside;
- ▲ Above standard site security and safety requirements, including site access control systems, building security;
- ▲ Installations and building upgrades above standard for specific storage areas or handling, such as (but not limitative) temperature controlled and cold storage;
- ▲ All exterior design such as flagpoles, façade advertising;
- ▲ Data/wifi/audio/visual installations, communication Installation / Phone line connection and services;
- ▲ Providing energy suppliers and services and above standard upgrades of power supply installations;
- ▲ Sprinkler security services (management);
- ▲ Property management (after final delivery project).

Pricing Level / Lease Conditions

This indicative pricing proposal is based on the Next Level baseline building specifications and all prices are quoted per square meter per annum in Euro, excluding VAT, excluded services and expenses.

Facility	List price
Warehouse	EUR 52/sq. m.
Office	EUR 120/sq. m.
Mezzanine	EUR 35/sq. m.
Storage	EUR 35/sq. m.

Incentives

- ▲ To be discussed

Lease conditions

- ▲ Early access warehouse based on planning;
- ▲ 5 or 10 year ROZ 2015 lease agreement;
- ▲ Extension period of 5 years each;
- ▲ Annual rent indexation, based on CPI (all house-holds 2015 = 100) starting 12 months after the commencement date;
- ▲ All prices are quoted in EUR, excluding VAT, price level date of this proposal, excluding services and expenses;
- ▲ Notice period of 12 months;
- ▲ Payment quarterly in advance;
- ▲ Sufficient bank guarantee;

Proposal validity

- ▲ This indicative proposal is valid for 30 days;
- ▲ The indicative proposal is subject to and board approval of Next Level Development B.V.

Next Steps

A detailed planning will be determined in consultation with the tenant, according to a joint development approach. Therefore we must clearly indicate the direction in which we intend the project to proceed.

The mainstays for the future

Our buildings are constructed on the following principles to ensure they are ready for the future:

Efficiency

Premises for efficient logistics
Logistics begins with logical thinking, mapping out the smartest and most efficient routes. The design concept reflects this. By avoiding unnecessarily long walking routes, for example, separating truck and car traffic and giving planners an excellent view of the docks where trucks arrive and depart.

A supremely safe working environment
The distribution centre, warehouses, loading bays... We check the safety of every square metre, leaving nothing to chance. The results are not only apparent in the safety doors, the internal walking routes and docking stations, but also in the traffic plan guaranteeing safety all around your building.

A facility with future-proof quality
A building delivered today must still be relevant decades later. So we make clear choices for today whilst anticipating future developments.

Appearance

A logistics building with optimal sustainability
Every logistics building we deliver is totally sustainable, with car charging posts, solar panel infrastructure and high insulation values as standard. A well-conceived energy concept is also part of the design and we make maximum use of daylight on the work floor, for example.

A comfortable working environment for all employees
Your employees are your greatest asset. We therefore consider their comfort when designing the logistics premises, for example by allowing as much daylight as possible in the workplace and optimising the indoor climate as well as by avoiding unnecessarily long walking routes.

About Next Level

Next Level Development in facts and figures

Next Level is a modest organisation but one which has a significant impact.
We deliver future-proof logistics real estate based on innovative, efficient and smart designs. Places where people enjoy working.

Development experience

500,000+ m²

Next Level provides support by:

Maximising

- The outcome of your business case
- The future-proofing of the building
- The quality of the materials used

Minimising

- Construction risks
- Financial exposure
- Organisational management
